UNIT- III

Designing Customer Experience

Understanding Innovation through Design Thinking; Use of Diagrams and Maps in Design Thinking – Empathy map. Affinity diagram, mind map, journey map, combining ideas into complex innovation concepts.

Enhancing Customer Experience; Service Design and Development Process, Service Experience Cycle and Case Studies

Designing Customer Experience (CX)

Customer Experience Strategy Process

from Customer Profile, Promise and Journey to Customer Experience Measurement, Analysis, Improvement

Customer	Promise	Journey	Measurement	Analysis	Improvement
Understand your audience & create **buyer personas**	Define what customers can expect from you, what makes you stand out from competitors, what **benefits and experiences you promise**	Create a clear **roadmap of your Customer Journey** including Touch Points with customers engagement levels	Decide on the **methodology, frequency** of Customer Experience measurement and define the **metrics** set to be applied	Determine the way you will **analyze** the customers **feedback** and steps to be taken to improve your pain points	Plan the efficiency enhancement aimed at Customer Experience boost via **proper corrective actions**

Meaning

Customer Experience (CX) refers to the **overall perception and emotional response** a customer has while interacting with a product, service, or organization across all touchpoints.

Key Elements of CX

- Customer touchpoints (website, store, app, service desk)
- Emotional response (frustration, satisfaction, delight)
- Service quality & usability
- Post-purchase support

Steps in Designing Customer Experience

1. Understand customer needs (Empathy)
2. Map customer journey
3. Identify pain points
4. Redesign interactions
5. Prototype and test improvements

Case Study: Online Food Delivery App

Problem: Customers abandon orders frequently.

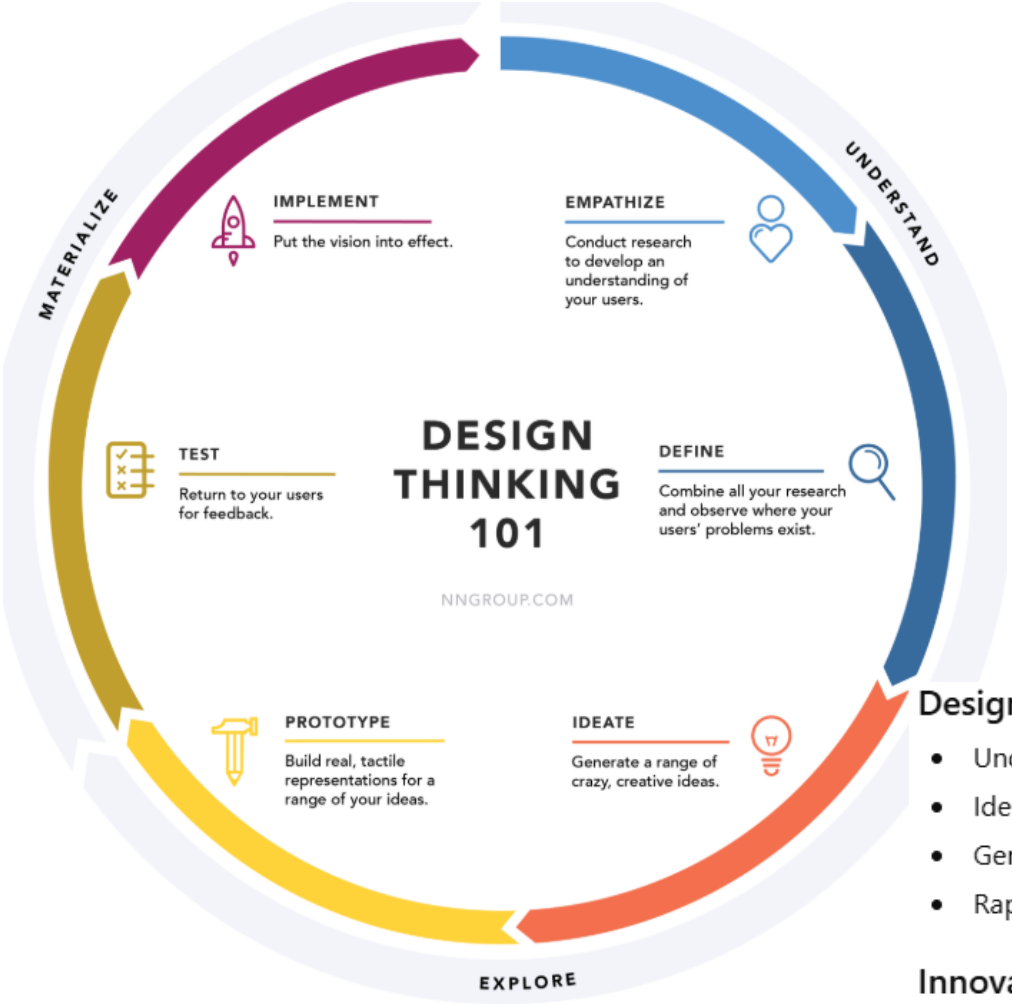

Observation: Long checkout time, unclear pricing.

Innovation:

- One-click reorder
- Real-time order tracking
- Transparent pricing

Result: Improved customer satisfaction and retention.

Understanding Innovation through Design Thinking

Design Thinking Drives Innovation By:

- Understanding user needs deeply
- Identifying latent needs
- Generating creative solutions
- Rapid prototyping and testing

Innovation Flow

Empathy → Define → Ideate → Prototype → Test → Refine → Innovation

Empathy Map

Purpose

To understand the user's **thoughts, emotions, and behaviors.**

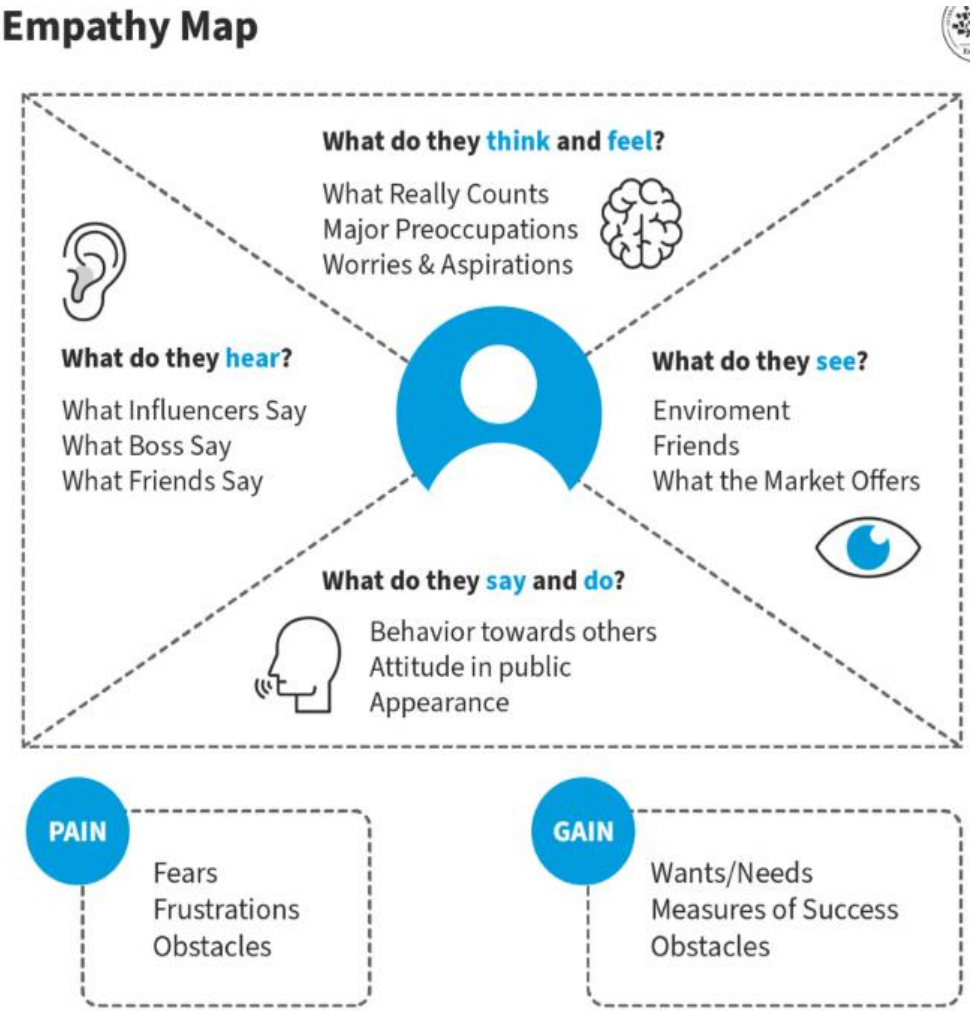

Components

- Says
- Thinks
- Does
- Feels

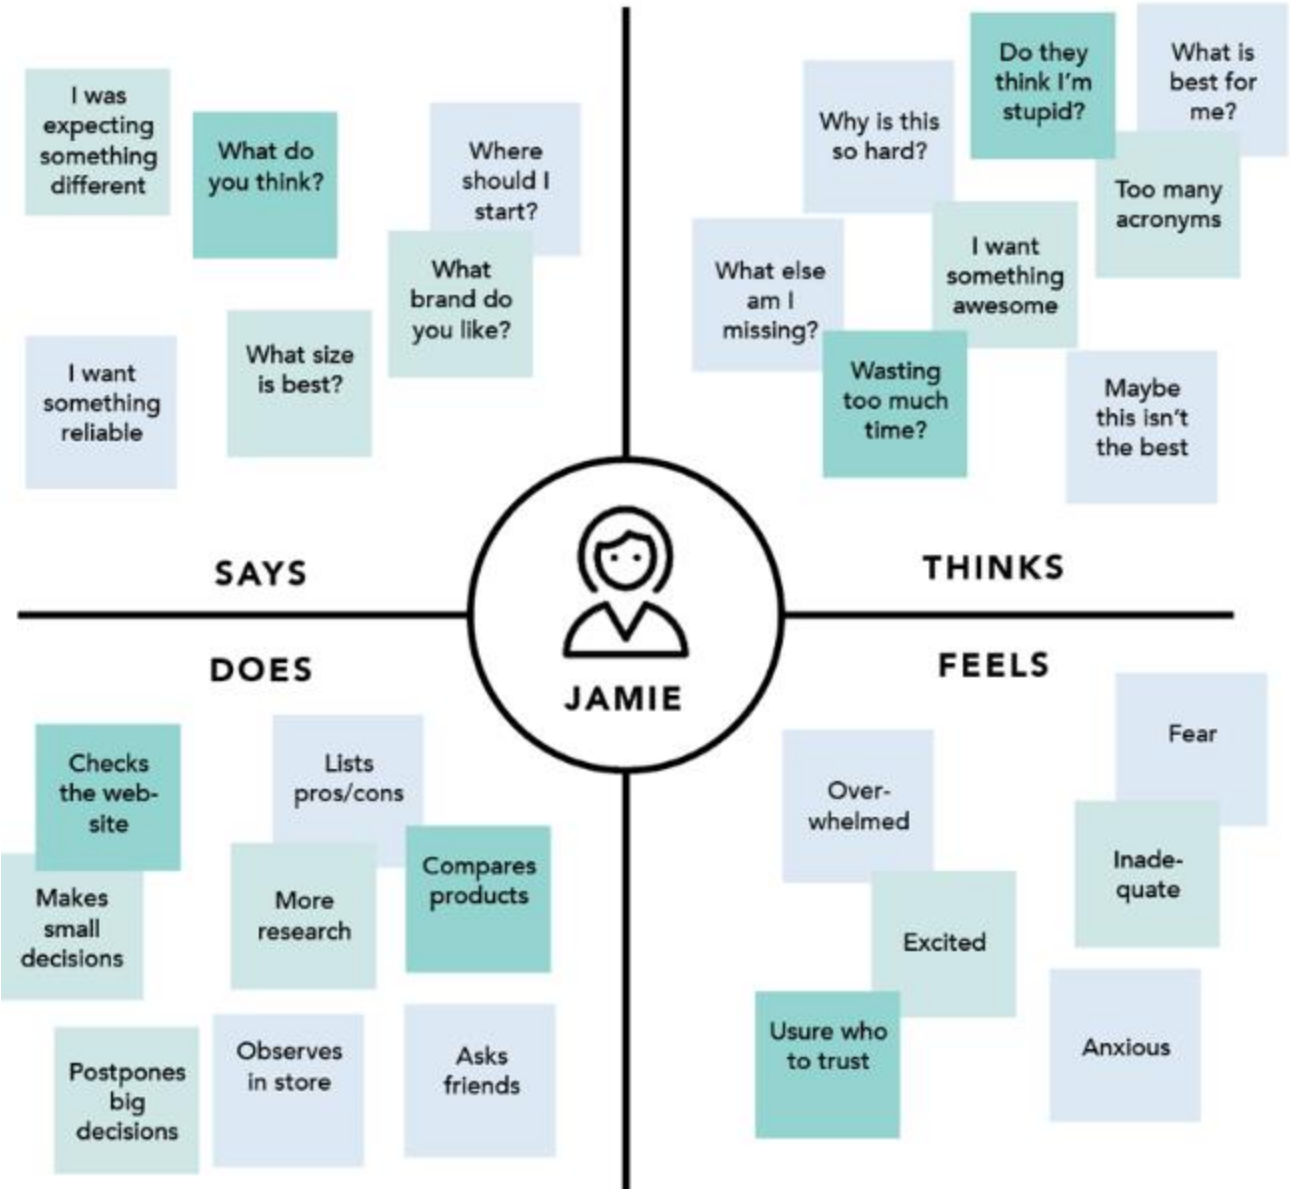

Case Study: Public Transport User

- Says: "Bus is always crowded."
- Thinks: "I may be late."
- Does: Leaves early.
- Feels: Frustrated.

Insight: Need for better scheduling & capacity planning.

EMPATHY MAP *Example* (Buying a TV)

Affinity Diagram

Purpose

Organizes large data into meaningful groups.

Process

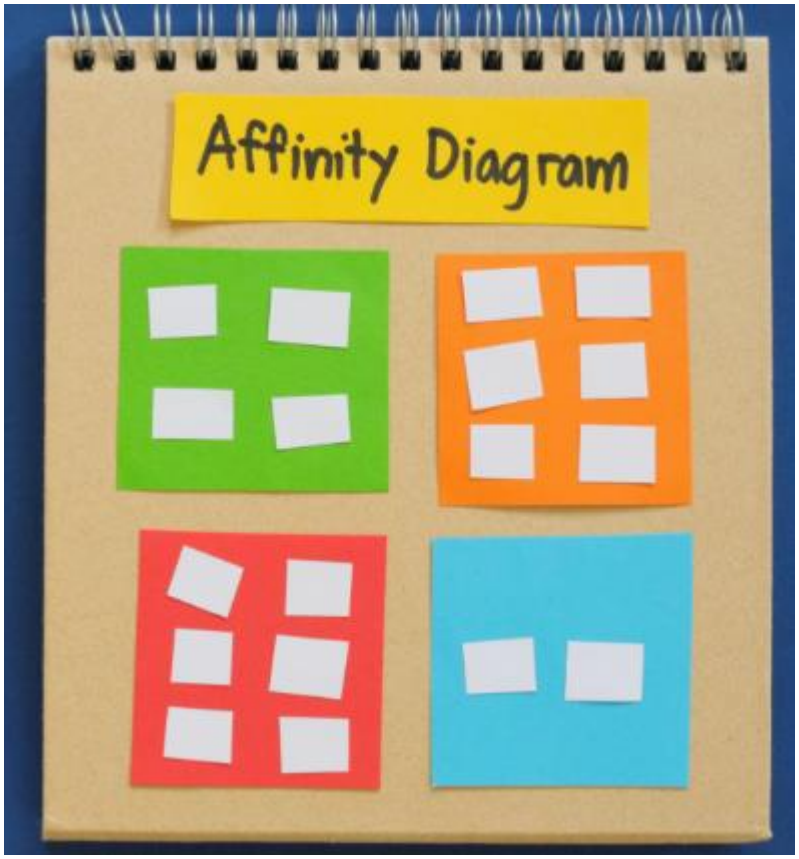

1. Write observations on notes
2. Group similar ideas
3. Identify patterns

Case Study: Hospital Feedback Analysis

Grouped issues:

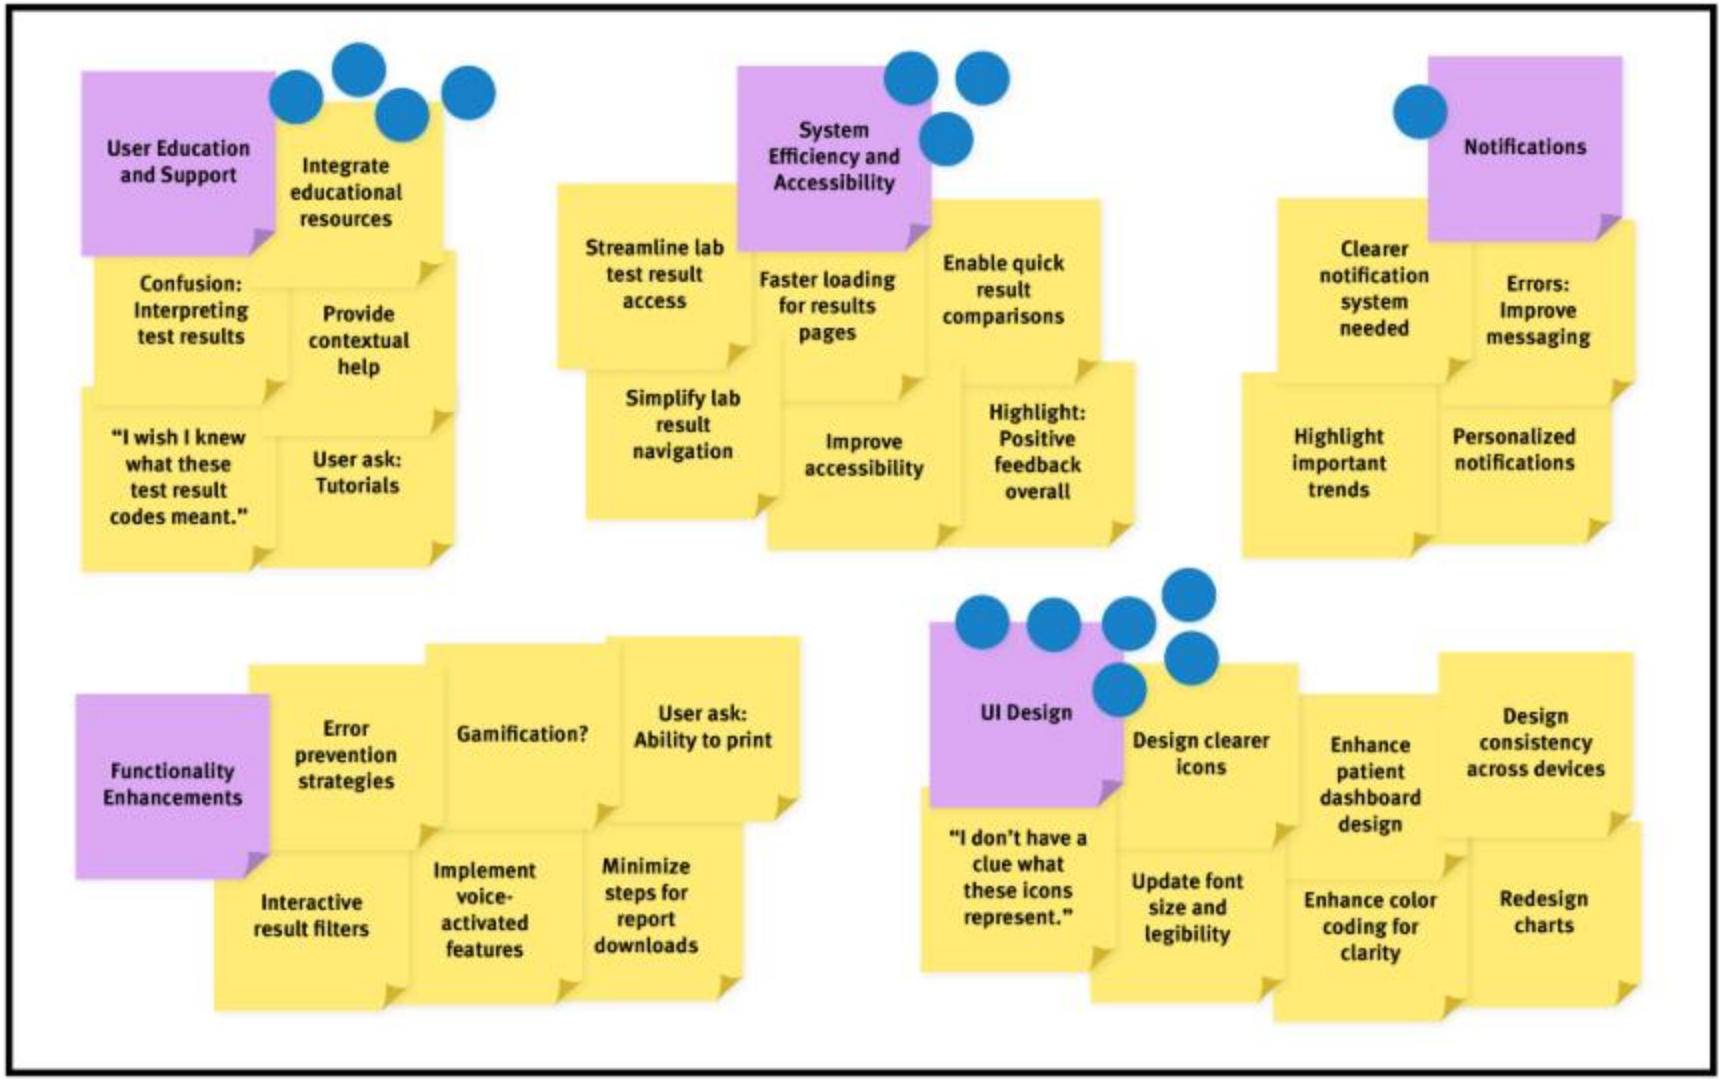

- Long waiting time
- Confusing billing
- Poor communication

Insight: Need for digital queue management.

Affinity Diagramming

Step 3: Prioritize Clusters and Next Steps

Mind Map

Purpose

Visual tool to connect ideas around a central theme.

Structure

Central Idea → Branches → Sub-ideas

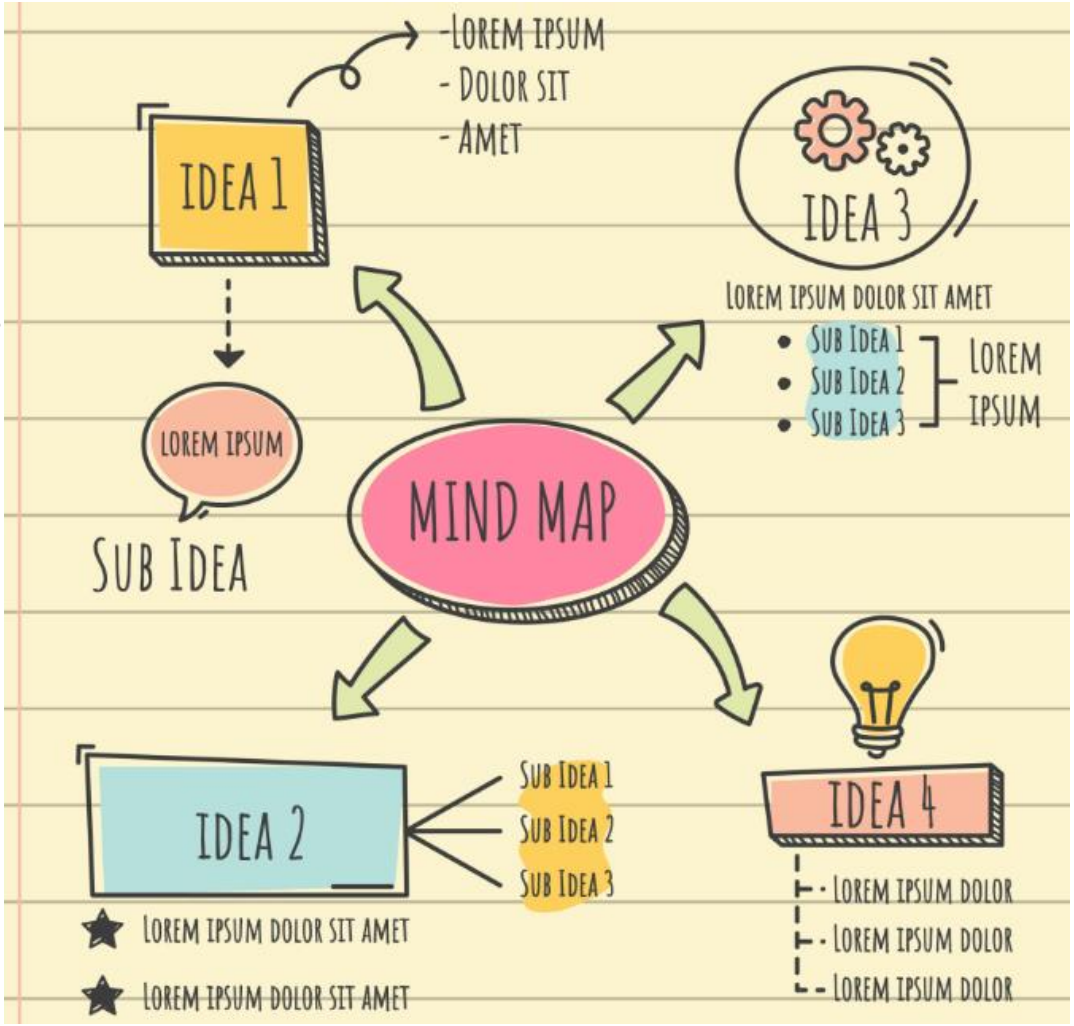

Case Study: Smart Helmet Design

Central Idea: Safety Helmet

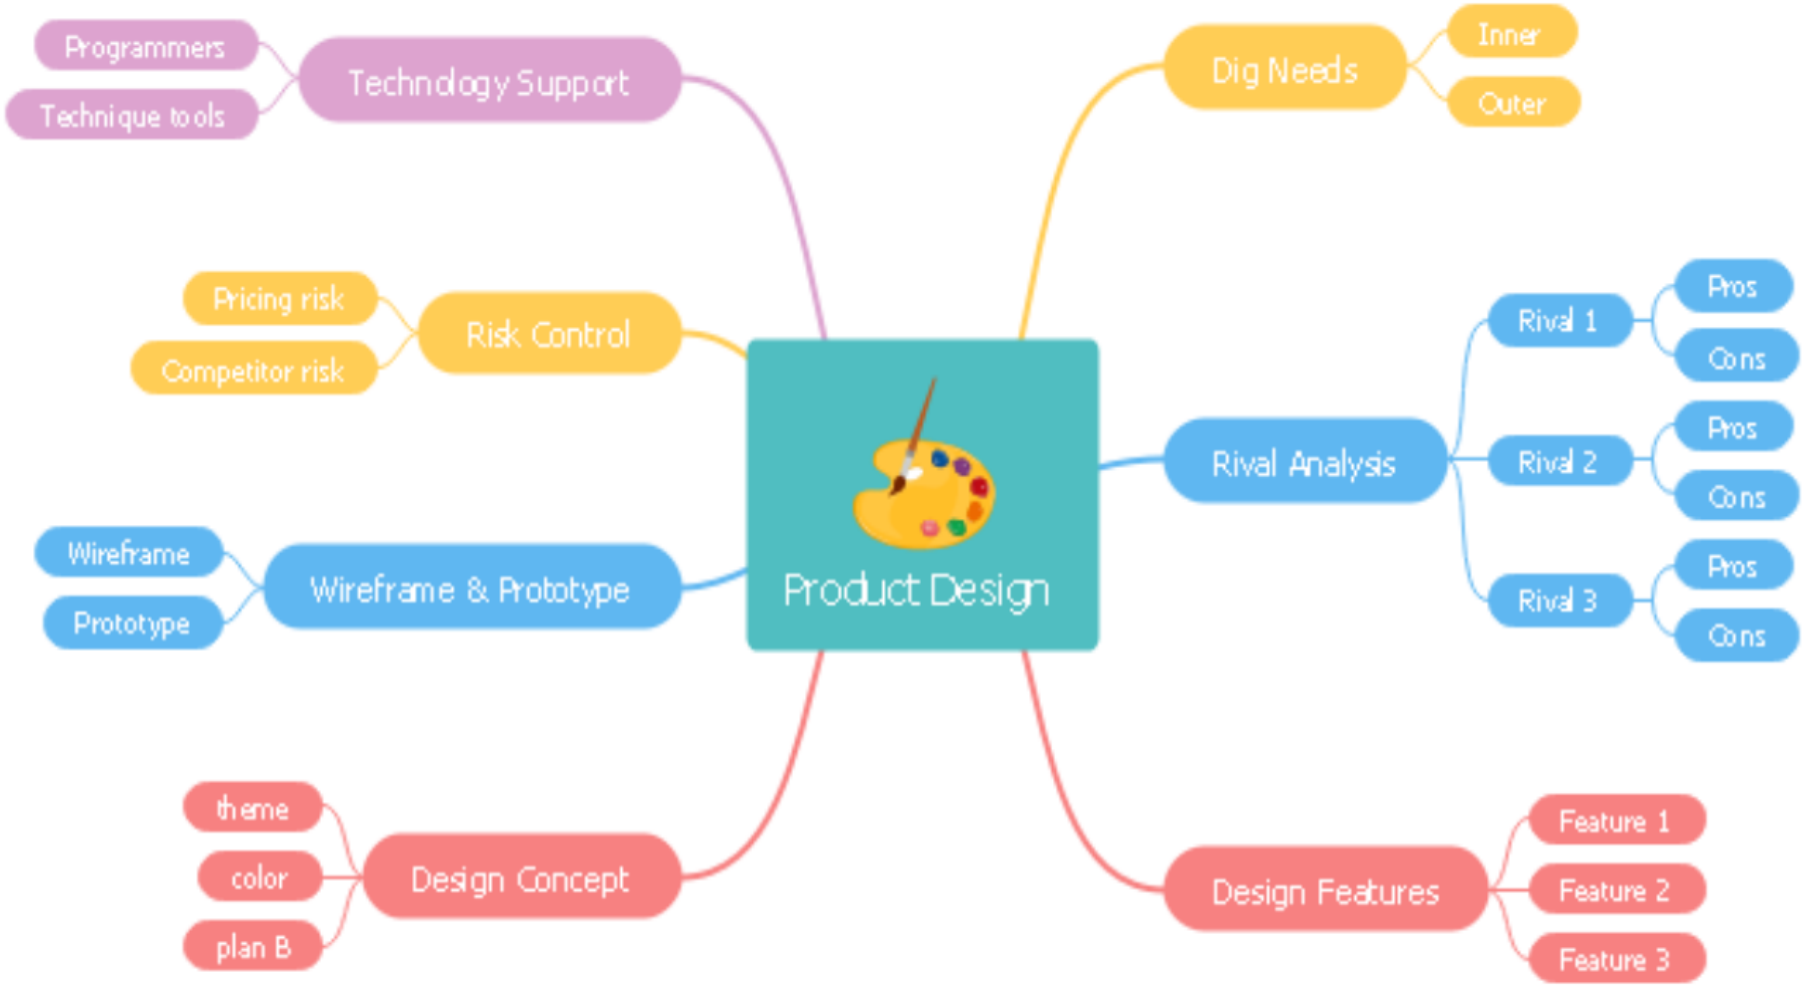

Branches:

- Ventilation
- Lightweight material
- Smart sensors
- Bluetooth communication

Outcome: Integrated smart safety helmet concept.

DESIGN THINKING
Design thinking minimizes the risks of innovation by engaging customers or users through a series of prototypes to learn, test & refine concepts.
1
EMPATHIZE
Learn about the audience
Observe & Interview
Listen
Ask questions
2
DEFINE
Define your scope
Look for patterns & insights
Question assumptions
Frame your P.O.V
3
IDEATE
Come up with many solutions
Experiment
Co-create with team members
Brainstorm & select
4
PROTOTYPE
Think big, Act Small, Fail Fast
Gather feedback
Refine
Learn from users
5
TEST
User testing and surveys
Evaluate
Gather Learnings
Iterate & Scale

Product Design

User Journey Map

Purpose

Visualizes customer experience step-by-step.

Components

- Stages
- Actions
- Emotions
- Pain points
- Opportunities

Case Study: Banking Loan Process

Stages:

1. Inquiry
2. Application
3. Verification
4. Approval

Pain Points:

- Long approval time
- Excess paperwork

Innovation:

- Online document upload
- Real-time status tracking

CUSTOMER JOURNEY MAP *Shopping for a New Car*

EMOTIONAL ERIC

Eric is an emotional car buyer. He purchases based on aesthetics and status.
Scenario: Eric recently moved to the area. He is shopping for a car that is fun to drive and dependable enough for use for everyday commuting.

EXPECTATIONS

- Ability to compare cars and their breakdowns
- Good photography with closeups, inside and out
- Video overview of car with demonstrations

CONSIDER
1 week

1. Sees TV commerical for a website, YourCarNext.net, which helps people shop for vehicles; visits the website
2. Sees ad on Facebook

"Wow that website looks great for car shopping!"

1

"This website looks much different from the commercial."

EXPLORE
2 months

3. Explores site and looks at all vehicles in his budget
4. Creates account; saves favorite cars in wishlist
5. Downloads mobile app while at his office

"I like that I can save cars and a list is automatically made"

"This mobile app is missing alot of features."

2

"I'm disappointed by the quality of some listings... very few photos."

"I might miss the perfect car if I don't check the site multiples times a day"

COMPARE
1 month

6. Reads *Consumer Reports* and reviews; keeps a spreadsheet to compare cars
7. Consults with trusted indviduals
8. Constantly checks site for new options that meet his criteria

"I wish all car dealerships were shown on a single map, so I can plan my route."

"It's difficult to narrow down options and parse through competing resources. I have to use a spreadsheet."

TEST
2 weeks

9. Selects a set of cars he plans to test-drive
10. Looks up location of each dealership on Google Maps
11. Visits dealership; fills out lead card, discusses process with sales person, drives car, discusses more; repeats process for each car
12. Discovers he can take notes about each car he drives in the app

"I love that I can take notes about these cars in the app. So helpful!"

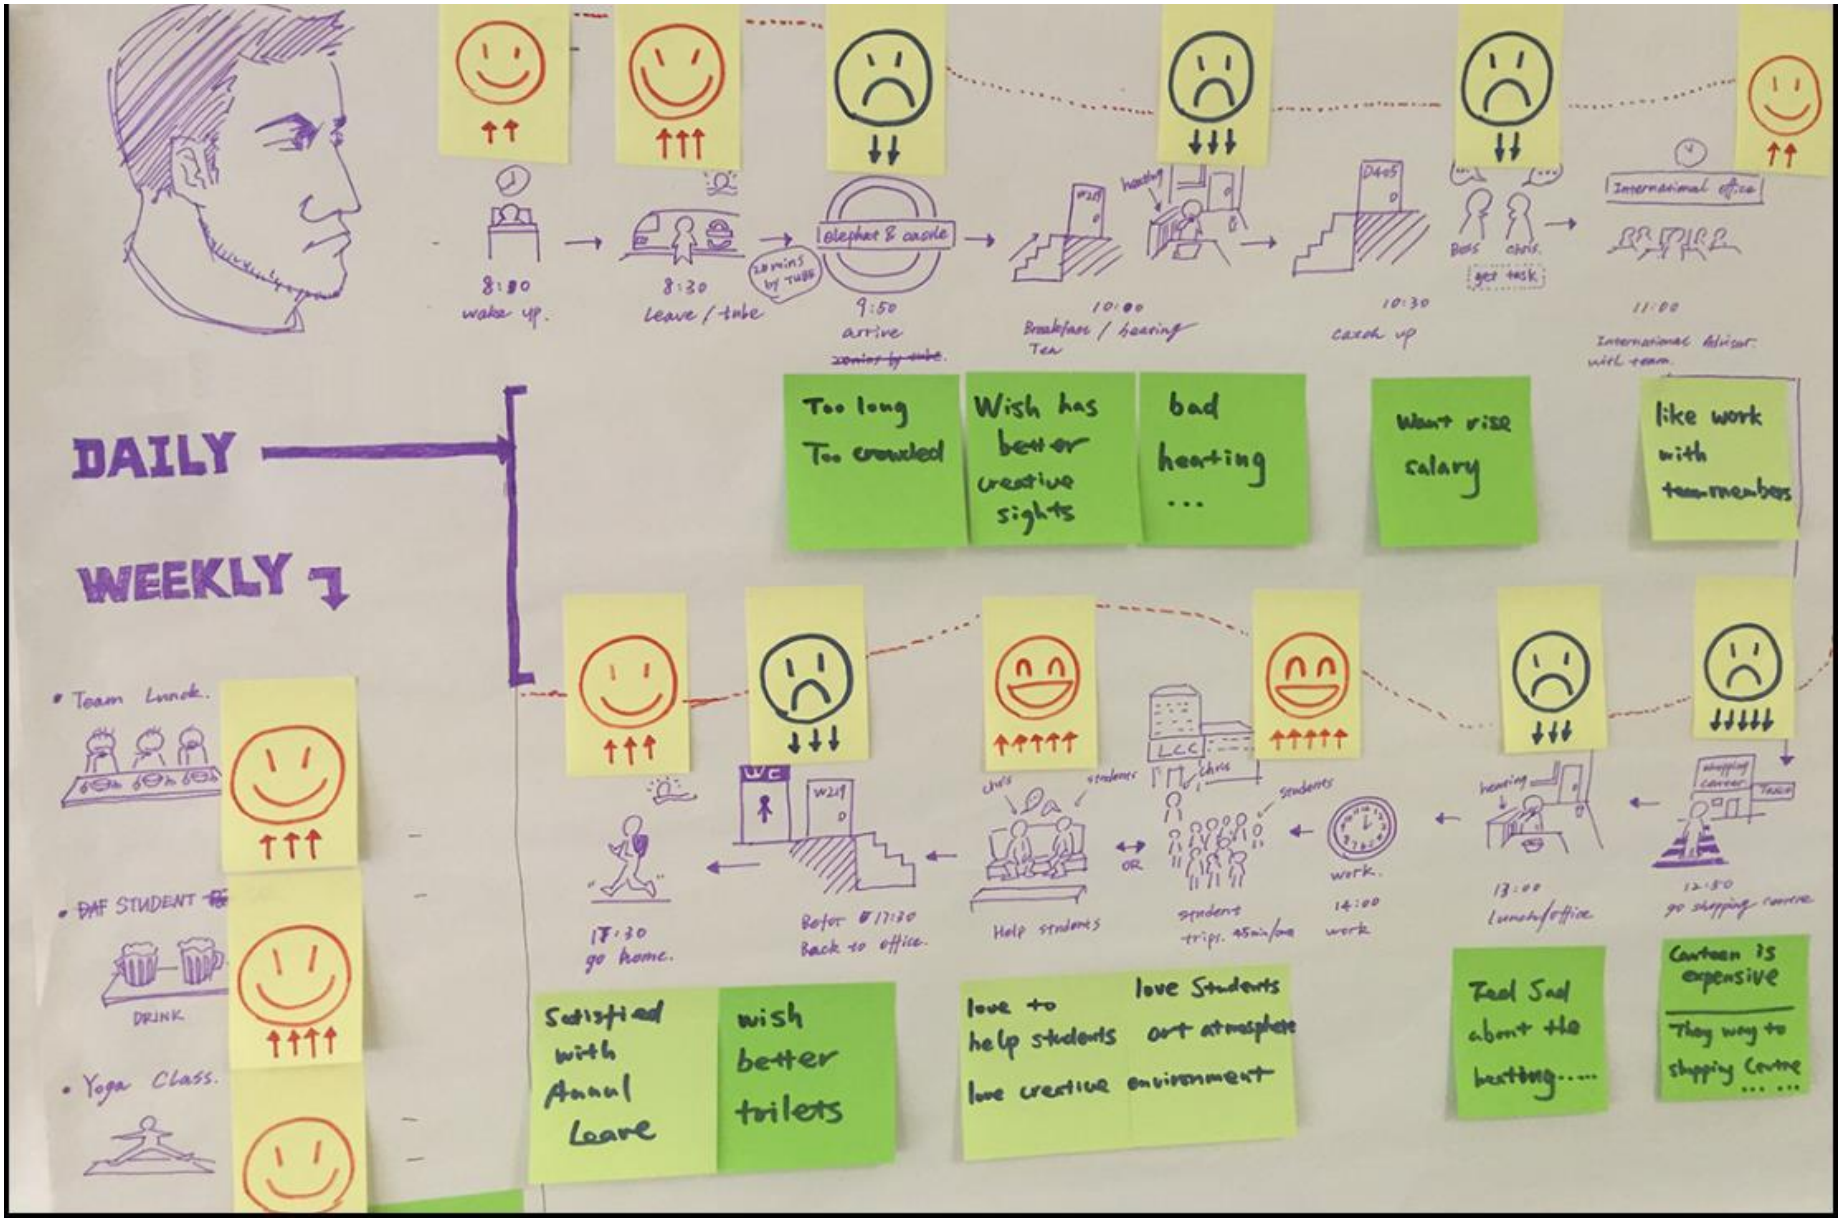

"Why does it take sooo long to test drive a car? I wish I knew it was going to be procedural and salesy."

NEGOTIATE
1 week

13. Decides on a car
14. Gets financing terms, total price, monthly payment from salesperson
15. Researches more, specifically about price
16. Makes a competing offer and buys his new car

"I'm so happy with my new car!"

"I wonder if I can get a better deal?"

DAILY
WEEKLY
8:30 wake up.
8:30 Leave / tube
20 mins by tube
Elephant & castle
9:50 arrive
10:00 Breakfast / Tea
10:30 catch up
Boss
Chris
get task
11:00
International office
Too long
Too crowded
Wish has better creative sights
bad heating ...
Want rise salary
like work with team members
Team Lunch.
DRINK
Yoga Class.
17:30 go home.
Befor 17:30 Back to office.
Help students
students trips. 45min/one
work.
14:00 work
17:00 Lunch/office
12:30 go shopping centre
Satisfied with Annul Leave
wish better toilets
love to help students
love Students
love creative environment
Feel Sad about the heating....
Canteen is expensive
They way to shopping Centre

Combining Ideas into Complex Innovation Concepts

Idea Synthesis Process

1. Generate ideas (Brainstorming)
2. Group ideas (Affinity Diagram)
3. Connect ideas (Mind Map)
4. Validate with Journey Map
5. Develop integrated solution

Case Study: Smart Public Transport System

Combined Ideas:

- GPS tracking
- Mobile ticketing
- Digital display boards
- Real-time traffic analytics

Final Innovation Concept: Integrated Smart Mobility System.

IDEO U DESIGN THINKING PROCESS

8 Summary Table

Tool	Purpose	Innovation Role
Empathy Map	Understand user emotions	Identify latent needs
Affinity Diagram	Organize insights	Detect patterns
Mind Map	Connect ideas	Expand creative thinking
Journey Map	Visualize experience	Identify improvement areas

Enhancing Customer Experience (CX)

Customer Experience (CX) is the **overall perception and emotional response** a customer has across all interactions (touchpoints) with a service.

Goals of CX Enhancement

- Reduce friction and waiting time
- Improve usability and clarity
- Personalize interactions
- Build trust and loyalty

Key CX Levers

- **Touchpoints:** Website, app, store, call center
- **Emotions:** Anxiety → Confidence → Delight
- **Consistency:** Omnichannel continuity
- **Feedback loops:** Continuous improvement

CX Improvement Steps

1. Map customer journey
2. Identify pain points
3. Redesign processes
4. Prototype & test
5. Measure satisfaction (NPS/CSAT)

Case Study: Airport Check-In Experience

Problem: Long queues and anxiety.

Interventions:

- Self-check-in kiosks
- Mobile boarding passes
- Real-time queue display

Outcome: Reduced wait time, improved passenger satisfaction.

Service Design and Development Process

Service Design is the process of **planning and organizing people, infrastructure, communication, and material components** to improve service quality and customer interaction.

Phases (Double-Diamond Model)

1. **Discover**: Research user needs
2. **Define**: Identify core service problem
3. **Develop**: Generate service concepts
4. **Deliver**: Implement and test service

Service Blueprint Components

- Customer actions
- Front-stage (visible) actions
- Back-stage (internal) processes
- Support systems

Service Development Steps

1. Identify customer need
2. Define service concept
3. Design service process
4. Prototype service
5. Pilot testing
6. Launch & monitor

Case Study: Online Banking Service

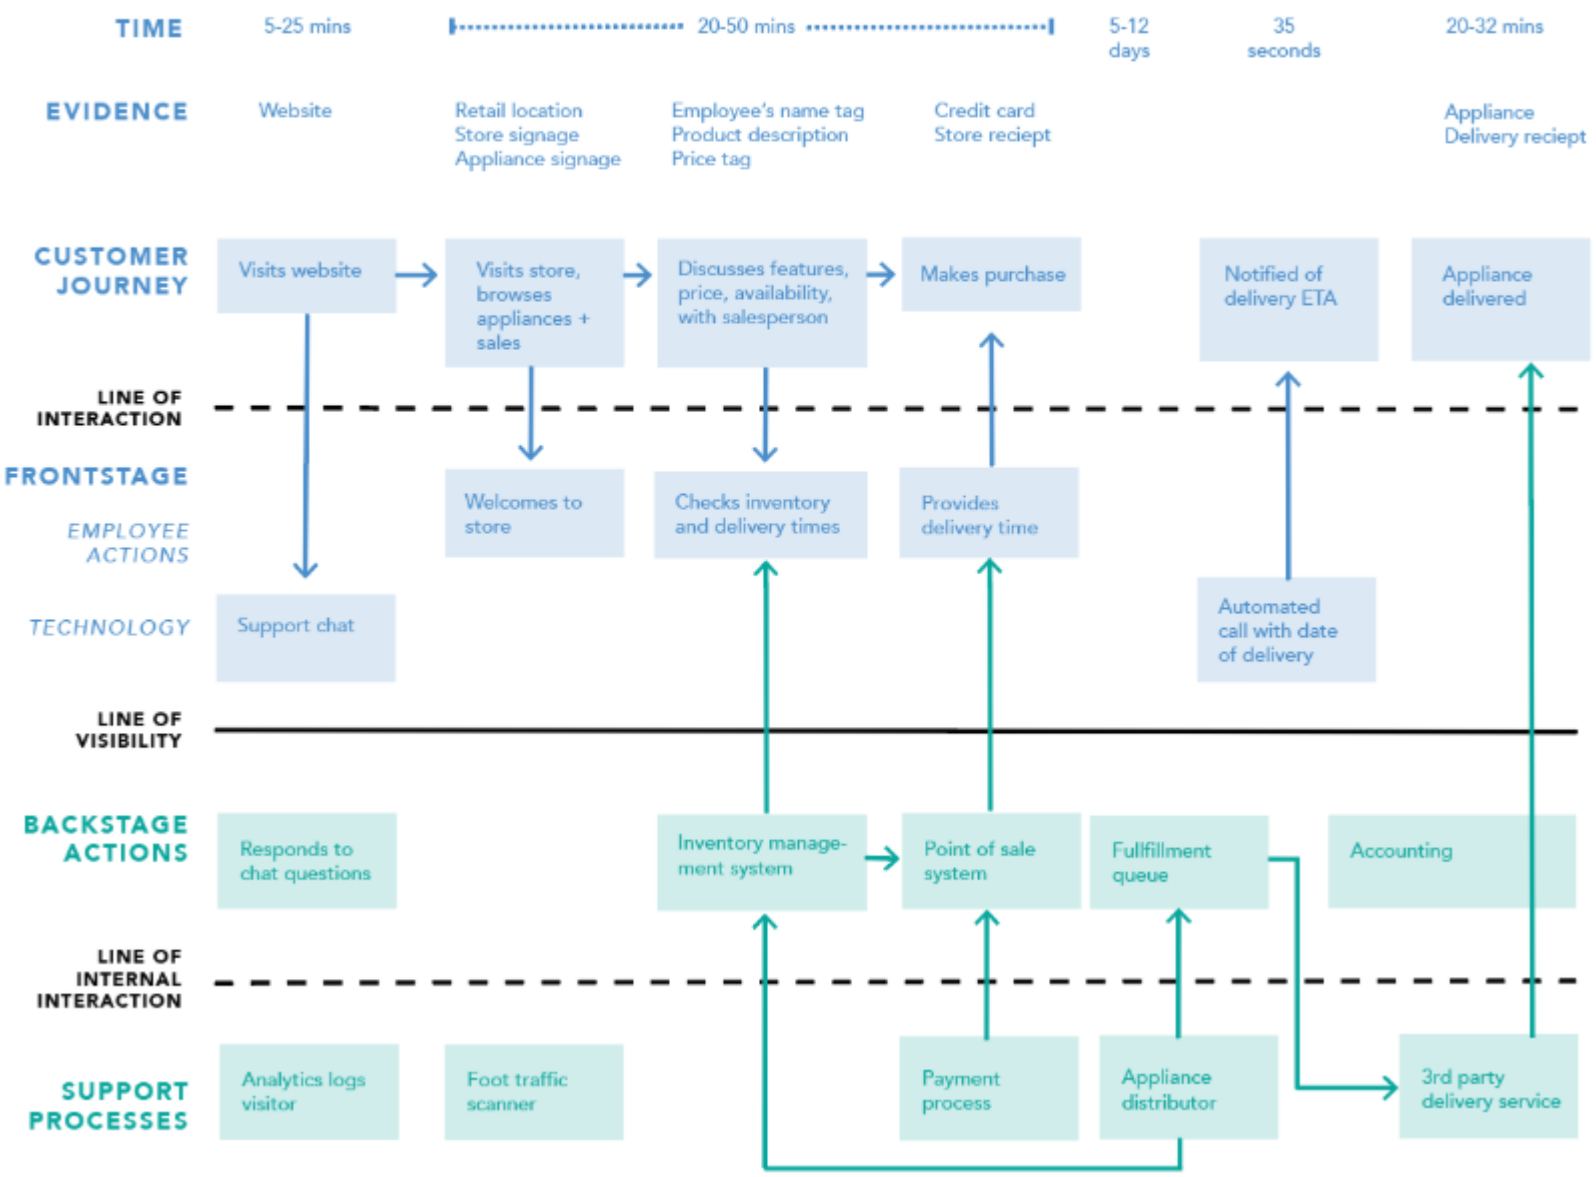

Problem: Customers find loan application complex.

Design Intervention:

- Digital document upload
- Chatbot assistance
- Real-time approval tracking

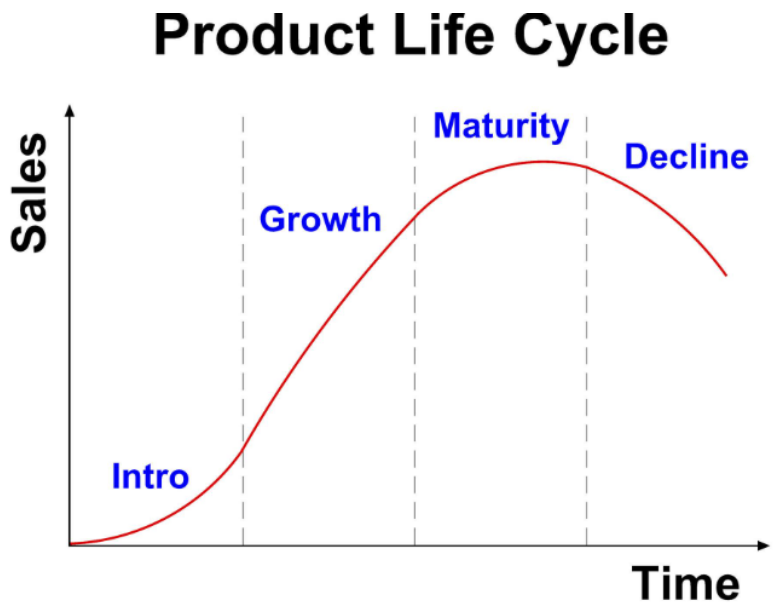

Result: Faster approval and higher satisfaction.

SERVICE BLUEPRINT *Example*

Service Experience Cycle

The Service Experience Cycle represents the **complete sequence of customer interactions before, during, and after service delivery.**

Stages of Service Experience Cycle

1 Pre-Service Stage

- Awareness
- Information search
- Expectation formation

2 Service Stage

- Interaction
- Service consumption
- Real-time experience

3 Post-Service Stage

- Feedback
- Support
- Loyalty or churn

Case Study: Hospital Service Experience

Pre-Service: Appointment booking → confusion

Service: Waiting → long delays

Post-Service: Billing → unclear charges

Improvement:

- Online scheduling
- SMS waiting updates
- Transparent billing

Outcome: Enhanced trust and patient satisfaction.
